

PALDECO

THE ELEGANT, FUNCTIONAL AND RESISTANT POLE

Profiled steel octagonal pole, made from hot galvanized steel, plasticized with PVC in green or anthracite grey pvc coated and other colours upon request, the posts are sealed by a plastic cap in various colours and are supplied either with or without a rectangular plate welded to the pole. The Panoplax + **Paldeco** system is particularly indicated for fencing in residential areas and, considering its extremely easy fixing system, for the DIY market. Panoplax panels are supplied in 60 pcs. packs and **Paldeco** posts in 60 pcs. bundles. To complete the fence, installation kit (screws and collars) is provided.

H cm	cross section mm	thickness mm	kg each
63	45x45	1,2	1,2
103	45x45	1,2	1,8
123	45x45	1,2	2,2
153	45x45	1,2	2,8
173	45x45	1,2	3,2

ACCESSORIES

Assembling kit with 10 collars and 10 screws with plastic cap, in charcoal or green color. Other colors upon request.

The laying of **Paldeco** on masonry bases is facilitated by the use of a specific metal plate to be bolted to the pole.

Also available with the plate welded to the pole, **Paldeco** is equipped with an assembly kit consisting of screws and collars.

Easy to assemble and extremely versatile, **Paldeco** is the ideal complement to many types of Cavatorta fenceings both in rolls and panels (Decoplax, Decoplax Evoluzione, Stilplax, Overplax, Everplax, Panoplax, etc.).
